25. How has the European financial crisis affected your views? Please indicate to what extent you agree with each of the following statements.

|   | Strongly agree | Agree | Neither agree nor disagree | Disagree | Strongly disagree |
|---|----------------|-------|----------------------------|----------|-------------------|
| Europe needs to pull together to defend itself against speculative markets, even if it means for countries like mine to make some economic sacrifices.                                | 1              | 2     | 3                          | 4        | 5                 |
| Europe should work cooperate to solve the financial crisis but it is the major powers and richer economies which have to bear the costs.  | 1              | 2     | 3                          | 4        | 5                 |
| Europe cannot really work together to resolve the financial crisis because decisions are made by a few politicians representing major powers without consulting the people of Europe. | 1              | 2     | 3                          | 4        | 5                 |
| The ultimate goal used to be close cooperation within the EU, but now countries like mine should rather try and manage on their own.  | 1              | 2     | 3                          | 4        | 5                 |
| The financial crisis confirms for me that the EU was a big mistake from the beginning and my country should never have joined.  | 1              | 2     | 3                          | 4        | 5                 |
